

1976 CHEVROLET ACCESSORIES CATALOG

Foreword

This 1976 Chevrolet Accessories Catalog is designed to help you equip your Chevrolet in a way that best suits your personal driving needs. But reading this catalog is just the beginning. Be sure to check with your Chevrolet salesman. Better than anyone else, he knows which accessories are available for, and compatible with, your car. He can also tell you about accessories that may not be shown in this catalog. And he can help insure that you get the items you want in the shortest possible time. Get to know him—and these 1976 Chevrolet accessories—today.

All vehicles shown in this publication contain production and/or dealer installed accessories which are not included in the base vehicle price. All illustrations and specifications in this brochure are based on the latest product information available at the time of printing. The right is reserved to make changes at any time without notice as to colors, materials, equipment, specifications and models and also to discontinue items or models.

Wheel Covers

What's your pleasure, formal, sporty or somewhere in between? These durable stainless steel and chrome covers look good no matter which one you choose.

Luggage Carriers

Just because you're going on vacation doesn't mean you have to leave all the comforts of home behind. Take along just about everything you need with a Chevrolet luggage carrier. They're good looking and strong with stainless steel straps and welded steel tubing. Rubber mountings prevent metal-to-metal contact between carrier and roof or rear deck panel, so there's no danger of scratching your car's finish.

Luggage Carrier Covers

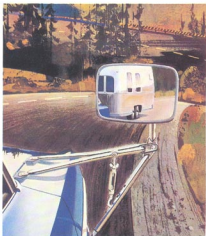

Long trips mean a lot of luggage and unpredictable weather conditions. Make sure your luggage stays clean and dry with your choice of Chevrolet luggage carrier covers. Easily mounted with tie-down straps, they're specially designed to match your Chevrolet rooftop luggage carrier. Side or rear-zipper openings make them easy to load. Most important, they're made of sturdy, fabric-backed, waterproof vinyl to help your luggage stay dry and secure.

Rear Window Air Deflectors

Specially designed for station wagons, Chevrolet stainless steel deflectors help keep your window clean when it's up and reduce air turbulence when the window is down.

Trailer Mirrors

When you're towing a big trailer, conventional mirrors may not be enough. Help provide a good look at the road behind with a pair of specially designed Chevrolet trailering mirrors. They're big (8" x 9") so you get a large, clear view. Rigid clamping devices make installation easy and secure. And they're built to last, made of stainless steel and first-surface chrome mirror glass.

Dead Weight Trailer Hitch (Class I)

For light utility and boat trailers—up to 2,000 pounds with a 200-pound tongue weight. This rugged hitch is compatible with standard production equipment. Your Chevrolet salesman also has hitches for loads up to 6,000 pounds with a 750-pound tongue weight.

Infant and Child Love Seats

When it comes to the protection of small children, you can never be too careful. These safety-engineered GM Love Seats use built-in harnesses plus your car's safety belts to make sure your little ones are buckled in securely. Both seats are padded for comfort and scientifically contoured to give your child correct body support. Both are lightweight and easy to store. Choose the Infant Love Seat for babies up to 20 pounds or the Child Love Seat for children up to 40 pounds and 40 inches in height.

Mini-Camper Tent

Nova and Vega hatchback drivers can have their own "home on the road" with this mini-camper tent. It's made of durable, weather-resistant nylon and affords plenty of room for two to sleep comfortably. Assembly takes just a few minutes.

Camping Mattress

Your Chevrolet dealer also has a handy mattress that's great for sleeping campers in the rear of a wagon or hatchback. A perfect match for your Chevrolet mini-camper tent, it comes in two sections—sized to fit your car—that can be snapped together or used separately. The comfortable 3½" foam pad is vinyl covered for long wear and easy cleaning.

Vanity Visor Mirrors

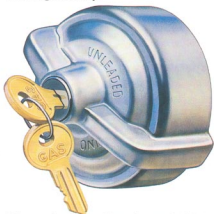

For freshening up after a hectic trip or adding a final touch before a night-on-the-town, there's nothing handier than a visor-mounted, vanity mirror. Select between unlighted or new lighted models.

Rear Door Locks

These easily installed locks are designed to help prevent the car rear doors from opening accidentally. They open for you with a simple movement of a key.

Locking Gas Cap

Discourage tampering with your fuel supply with this heavy-duty locking gas cap. It features a sliding key shutter to help keep out moisture, first-quality lock cylinders and comes with two keys.

Cruise Control

Just attain the speed you want and Cruise Control does the rest with the touch of a button. Your desired speed is maintained automatically. If you need to speed up, just depress the accelerator—then release the accelerator to automatically return to your preset speed. To disengage, simply touch the brake pedal. Cruise Control can help reduce driver fatigue. It's great for long trips or expressway driving.

Car Compass

East is east and west is west . . . and sometimes it's awfully handy to be sure of the difference. This easy-to-read, windshield-mounted compass features a suspended dial that lets you know which way you're going as you're going. No special tools required for installation.

Outside Rearview Mirrors

Add a passenger side mirror to help provide increased visibility, or replace your original mirror with a sport model. Choose between manual or remote models for both driver and passenger side. They're all made with high quality materials and built to last.

Convex Mirror Attachments

A permanent adhesive bonds these mirrors to existing right-hand mirror heads in one easy step. Their convex shape gives you a wider field of vision.
