TEMPT TEMPTATION

Monsoon brings on a 400-watt flood of sound. Tempting? We thought so. Available on Sunfire GT and SE Coupes, this sophisticated stereo system combines high power, high fidelity and a high level of features you might not expect. One is RDS, the Radio Data System: It identifies the broadcast stations you like (rock, jazz, country, etc.), displays their call letters and searches for your kind of music. RDS also receives emergency broadcasts and can interrupt even if you are listening to a cassette or a CD. The system can play both cassettes and compact discs, and pumps its sound through eight Monsoon speakers placed in prime acoustic locations. Separate subwoofers deliver serious bass. The system is so sophisticated that it even remembers equalization settings for individual radio stations and turns the volume up as you accelerate. The net result is that you'll be tempted to listen long and hard. Why fight it?

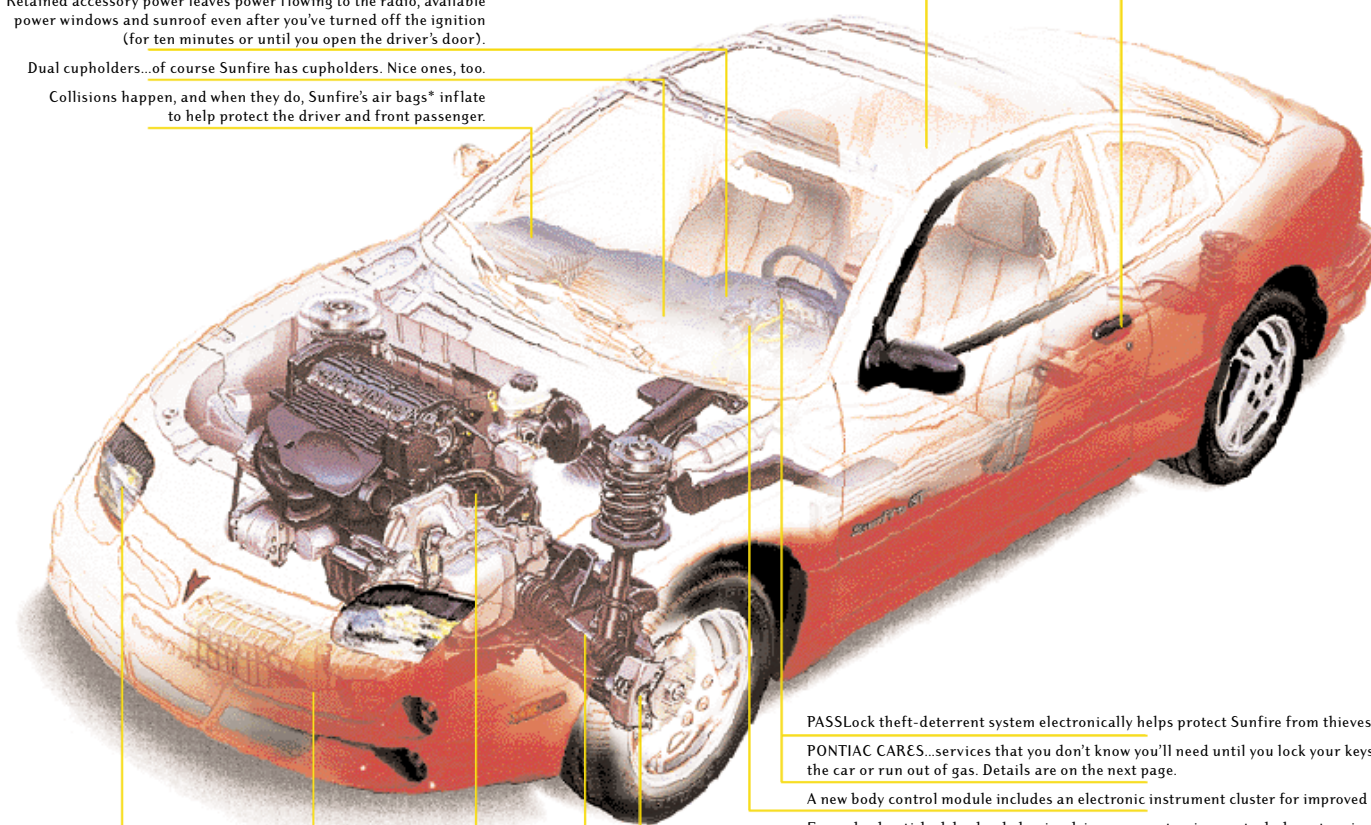

The two key fobs included with the available remote keyless entry enable two drivers to program their favorite radio stations and equalizer presets into the audio system. Once programmed, Sunfire recognizes each driver by their individually coded fob and has their individual radio settings ready and waiting for them, regardless of who last drove the car and made changes to the radio settings.

The folding rear seatback is standard on every Sunfire, even the GT Convertible. You need flexibility, and Sunfire delivers.

Retained accessory power leaves power flowing to the radio, available power windows and sunroof even after you've turned off the ignition (for ten minutes or until you open the driver's door).

Dual cupholders...of course Sunfire has cupholders. Nice ones, too.

Collisions happen, and when they do, Sunfire's air bags* inflate to help protect the driver and front passenger.

PASSLock theft-deterrent system electronically helps protect Sunfire from thieves.

PONTIAC CARES...services that you don't know you'll need until you lock your keys in the car or run out of gas. Details are on the next page.

A new body control module includes an electronic instrument cluster for improved accuracy.

Four-wheel anti-lock brakes help give drivers more steering control when stopping hard on wet or slippery roads. You never know when you're going to need it.

The Enhanced Traction System (ETS) is an integrated feature of the available 4-speed automatic transmission. Its sophisticated computer programming helps keep Sunfire moving on slick pavement by helping prevent the front wheels from spinning.

Battery run-down protection turns off the interior lights if they're accidentally left on.

5-mph bumpers help fend off minor front bumps.

Daytime running lamps help other drivers see your Sunfire...like they'll need any help.

*Always use safety belts and proper child restraints, even with air bags. Children are safer when properly secured in a rear seat. See the Owner's Manual for more safety information. See note about child safety in Occupant Protection section.
