Visionary. Ingenious. Remarkable.
Every vehicle bears his signature.

Henry Ford

When good looks make good business sense

Agile, nippy and good-looking, the stylish new Ford Fiesta Van is still as fuel efficient and dependable as ever.

Model shown is a Ford Fiesta Sport Van in Race Red body colour.

Remarkably efficient.

Fiesta Van balances lively performance with class-leading emissions and exceptional fuel consumption. Our engines deliver a great driving experience and are remarkably fuel-efficient thanks to Ford ECONetic Technology, with all our diesel options delivering more than 64mpg and less than 100g/km of CO₂.

Less fuel. More power. Lower emissions.

The ECONetic pack brings together a range of vehicle features and technologies to deliver improved fuel economy, reduced emissions and lower cost of ownership. The **1.6 Duratorq TDCi 95 PS** diesel engine with Auto-Start-Stop and Smart Regenerative Charging produces CO₂ emissions of just 87 g/km*, while Hill Start Assist and Electric Power Assisted Steering improve driving efficiency without compromising on great vehicle design or driving dynamics.

*Ford test figures. Combined value including Auto-Start-Stop system.

Making work feel like play.

Ford SYNC with AppLink* lets you play music, make and receive hands-free calls and even control apps on your smartphone – all with simple voice commands. And the **Ford Emergency Assistance*** feature is designed to assist occupants to place an emergency call and provide the emergency services with vehicle location information in their own language.

*Compatible mobile phone required. (SYNC AppLink is available on Fiesta Vans built from April 2014) You can browse a list of AppLink-compatible apps from your regional Ford website, or via the App Catalog available in iOS and Android stores. SYNC AppLink and Emergency Assistance are not supported by all European languages.

See more in front and behind.

Fiesta Van's optional **built-in navigation system** allows you to travel in confidence eliminating the need for pre-route planning. Select reverse gear and the optional **rear-view camera** comes on automatically in the navigation display, allowing you to see objects behind your van. Special guidance graphics indicate the width and centre line of the van, based on the steering angle, for safer and easier manoeuvring. (Option)

Fuel, performance and emissions

The fuel economy figures quoted in the table below are achieved by following strict EU governed test procedures and are specifically designed to enable customers to compare vehicles from all manufacturers on a like-for-like basis. Fuel consumption is directly affected by the length of the journey; number of passengers and amount of luggage carried; individual driving style; road and traffic conditions; weather conditions; vehicle age, mileage, condition and standard of maintenance; use of vehicle features such as air conditioning; and any modifications to the vehicle such as the addition of a roof rack. Your fuel economy will vary based on these and other factors and, for these reasons, many drivers may not achieve the EU fuel economy figures (below) in day-to-day driving, although the vehicle is technically capable of doing so.

*In 4th gear. ⁸⁾Ford test figures. ⁸⁾The declared Fuel/Energy Consumptions, CO₂ emissions and electric range are measured according to the technical requirements and specifications of the European Regulations (EC) 715/2007 and (EC) 692/2008 as last amended. Fuel consumption and CO₂ emissions are specified for a vehicle variesnt and not for a single vehicle. The applied standard test procedure enables comparison between different vehicle types and different manufacturers. In addition to the fuel efficiency of a car, driving behaviour as well as other non-technical factors play a role in determining a vehicle's fuel/energy consumption, CO₂ emissions and electric range. CO₂ is the main greehouse gas responsible for global warming. A guide on fuel economy and emissions which contains data for all new passenger car models is available at any point of sale free of charge or can be downloaded from <http://carfueldata.dft.gov.uk/>.
