INTERIOR

Compact size with interior roominess

How can such a compact car feel so spacious inside? The answer lies in the long wheelbase and minimised front and rear overhang. Wheels are positioned in each corner, creating space where it's needed – in the cabin. This longer wheelbase accommodates at least 4 adults comfortably. The generous height and width provide added head and shoulder room. The forward windscreen position also enhances the spacious feel.

Versatile space

Every available bit of space inside the Micra is used for intelligent storage. There's a hidden compartment under the front passenger seat for valuable items. A secret mobile phone drawer. And that's just the start. Push the sliding rear bench seat back and there's as much legroom as cars in the next class. Pull it forward for an amazing 371 litres (VDA) of luggage space. The rear bench also split-folds so large loads can easily be stowed.

Comfortable space

The Micra's high seating position provides effortless good visibility. It also helps occupants enter and exit the car easily. Lumbar support in the seats keeps you comfortable even on longer trips. On higher grades, the driver's seat height can be adjusted with an easy to reach lever. Its stylish interior offers standard front power windows to operate windows with a simple touch.

User friendly technology

Micra's automated technology handles tasks so you can enjoy the driving: automatic headlights and wipers, automatic A/C on higher grades, even an automatic one-touch up/down driver's window. Remote steering wheel switches allow you to control the 2 din audio system (with a 6-CD changer) while keeping your hands on the wheel. A new oil level display and the smart combimeter show essential information clearly and includes a 9-function drive computer on higher grades.

EXTERIOR

Unmistakable style

Micra's unmistakable style now shouts even louder. The chic SE and SVE grades make a firm statement on the street with their chunky front bumpers and new front grille. And the SPORT and 160SR grades rev up the excitement with sporty touches like a streamlined roof spoiler, stylishly dark 16" alloy wheels and highlighted front-bumper housing for the foglamps.

Electric tilt and slide sunroof

Micra offers a sunroof as option. Easy to use, the electric tilt and slide sunroof has a large opening for maximum sunshine.

160SR Exterior styling

The new 160SR is the Micra at its most sporty, with its streamlined roof spoiler, flared side sills, and highlighted fog lamps housing in the front bumper. Dark finish headlamps and 16" alloy wheels and a bright exhaust tailpipe make it look even more exhilarating – and it is!

NISSAN MICRA Performance

Compact shouldn't mean boring

ENGINE

Petrol engines

The Micra petrol engines have 16 valves and drive-by-wire throttles, so they accelerate eagerly and cruise easily. There are three to choose from: 1.2 litre (Low and High power), a 1.4 litre and a 1.6 litre. The choices offer a blend of performance and fuel economy to suit all types of driver requirements.

Diesel engines

Micra offers the latest common-rail diesel technology. There are two versions of its smooth and quiet 1.5 litre direct injection diesel engines, both lively and enjoyable with a broad power band that builds up to 65PS or 82PS.

HANDLING & BRAKING

Agility

Responding to every touch, the Micra is incredibly nimble. With its compact exterior and best-in-class turning circle, it's easy to park on congested city streets. The standard Electric Power Steering (EPS) offers variable assistance and self-centring action that are finely tuned to the car's speed. EPS also features damping control to measure steering angular velocity and speed to improve stability. ABS keeps the wheels from locking - keeping you in control of the car.

Braking beyond its class

Three standard braking systems work together to help you stop safely. Electronic Brake Force Distribution (EBD) ensures optimum braking on all wheels, depending on car load and road surface. Brake Assist measures the force a driver applies to the brake pedal. When the force exceeds a preset amount, Brake Assist applies the brakes fully. And ABS prevents the wheels from locking so you stay in control of the car.

Electronic Stability Program

The Electronic Stability Program – standard on 160SR relies on electronic sensors to monitor wheel speed and steering angle. To help keep you in your intended direction on slippery roads and in emergency manoeuvres, the system reduces engine output and applies braking to individual wheels to correct under- and over-steer.

Safety and Security

It's all about you

PASSIVE SAFETY

Front & side airbags

The Micra features up to 6 airbags. The dual front airbags help protect you and your front passenger. But it also has side and curtain airbags – systems usually found only on much more expensive models. The side airbags, housed in the seat, help protect your head and chest. The curtain airbags run the length of the interior to protect front and rear occupants from impacts of outside objects in a crash.

Seat belt design

Front seat belts with pretensioners automatically help tighten the belts when the air bags deploy. And if your body puts too much force on the belt, load limiters cause the belt to give a little bit. Both features help reduce injuries.

ISOFIX child safety seat

The ISOFIX child safety seat can be securely fitted into the anchorage points in the Micra. Children should always be carried in the rear -- but if necessary, the passenger airbag cut-off switch lets you safely use a child seat in the front passenger seat.

Active headrests

The Micra's active headrests may save your neck. If a rear impact accident occurs, these headrests move forward to limit head movement. So there's less risk of serious neck injuries. As the impact subsides, a spring mechanism returns the headrest back to its normal position.

ACTIVE SAFETY

Safer braking

Three standard braking systems work together to help you stop safely. Electronic Brake Force Distribution (EBD) ensures optimum braking on all wheels, depending on car load and road surface. Brake Assist measures the force a driver applies to the brake pedal. When the force exceeds a preset amount, Brake Assist applies the brakes fully. And ABS prevents the wheels from locking so you stay in control of the car.

Electronic stability program

The Electronic Stability Program – standard on 160SR relies on a myriad of electronic sensors to measure wheel speed and steering angle. In order to help keep you in your intended direction on slippery roads and in emergency manoeuvres, the system reduces engine output and applies braking to individual wheels to correct under- and over-steer.

NISSAN MICRA

Grades & equipment

AVAILABLE GRADES

Grade : E

The E grade is the first in the exciting line up of Micras. And it's packed with 'big car' features that are standard throughout the range, such as ABS, electric speed sensitive power steering and, of course, incredible roominess.

From £8,175

Grade : S

If you're looking for a distinctive compact that's fun to drive and packed with 'big car' features (such as ABS, driver and passenger airbags, CD player and electric speed sensitive power steering)...this is it.

From £8,730

Grade : SE

The SE grade is where the Micra's superb functionality really comes into play. Features like air conditioning, integrated drive computer and in-dash 6 CD autochanger help to put you at ease.

From £9,730

Grade : SPORT

The Sport is a streetwise city car with an eye catching exterior design that borrows heavily from its big brother the 160SR, including 15" alloys, fog lamps, sport bumpers and side spoilers. The interior has an exclusive two tone seat trim and a leather steering. You're bound to stop traffic even out of rush hour.

From £9,880

Grade : SVE

The SVE grade is where drivers can really benefit from the Micra's friendly technology. Ingenious features like the Intelligent Key System, the automatic air conditioning, the rain sensing wipers and rear park system make life easier, so you can enjoy driving the Micra even more.

From £11,175

Grade : 160SR

The new Micra 160SR – short for Street Racer – brings a whole new dimension to the range. Think graphite finished 16" alloys, roof and side spoilers. Add in a 1.6 110PS petrol engine with enhanced handling and you have a Micra that should satisfy any budding performance enthusiast.

From £9,995
