

1996 X-90

 **SUZUKI**

X HILARATING EXTERIOR.

Introducing an Xtraordinary vehicle. Oh yes, it's a T-top. But, surprise, it's also 4-wheel drive. Or a 2-wheel drive. Definitely, it's like nothing ever seen or driven before. It's the newest, hottest sporty SUV on the road. It's the X-90 by Suzuki and, with its soft curves and sharp road action, the X-90 is ready, willing and able to move from on-road to off-road, from pine-rimmed sea to churning desert sand. Absolutely, the right vehicle for the '90's. It's fun. It's versatile. It's an adventure waiting to happen. **Watch for the X-90.**

This isn't just another hip vehicle. It's the only "sporty" utility vehicle around. With a T-top that lets in the sun and air and an aggressive 1.6-liter, 16-valve, SOHC engine that means plenty of power. You won't find anything else on the road like the X-90. The T-top provides an open-air feel while the 4x4 takes it where you want to explore. Plus, the X-90 has all the Xtras for power and safety. Standard 5-speed manual and, on the 4-wheel drive model, an optional 4-speed automatic transmission. Also standard are power steering and 4-wheel anti-lock brakes. It has a center high-mounted stop lamp incorporated into the rear spoiler. And a right-now, '90's look. Just glimpse at the tinted glass, color-

These classy, light & strong, aluminum alloy wheels are standard equipment on the 4WD.

keyed bumpers and body color carried through to the front grille. Also, the classy aluminum alloy wheels and automatic locking front hubs on the 4-wheel drive model. For added touches, the X-90 has dual outside mirrors and a locking fuel door to complete the standard Xterior equipment on this simply Xcellent vehicle.

It's the NEXT BIG THING.

There is nothing on the road like the X-90. With all the advantages of a sport/utility vehicle, a smooth ride and outstanding Suzuki quality and reliability. It's a T-top that knows how to cover up. Or, it can take it off, with a top that stores right in the trunk. It has 4WD that can power

you up a mountain and room to take on cargo at the shopping mall. This vehicle does everything, goes everywhere. It's new and it's for new thinking. It's the X-90.

THE FEEL-GOOD VEHICLE FOR THE 90'S.

Xtreme is in. Xtreme skiing, Xtreme snowboarding and Xtreme mountain biking, just to name a few.

Sports like Street Luge are catching on.

Street Hockey has kids in Miami playing Canada's favorite game.

Technology has the daring in Alabama skiing down mountains of plastic pellet snow in summertime.

Women are boxing for exercise and self-defense.

The young and strong of heart are skyboarding.

Mountain climbers are resting-up by sleeping suspended at 10,000 feet.

High-rise dwellers in urban centers share the work and the harvest from local community gardens.

Volunteering for groups dedicated to making the entire world a better place has never seen such an increase in membership.

Welcome to the '90's. Fun is becoming more daring than ever. Doing more and being more are in.

Fully covered or exposed to the sun and air, the T-top on the X-90 makes travel fun and practical, too. The T-top panels store conveniently in the trunk.

Check out

the interior. It's Xtreme.

This is one good-looking vehicle. The Xterior makes you want to look and look again, maybe even gasp and stare. The interior has features intended to urge you toward ownership.

Look at the sporty, ergonomically-designed dash, with tachometer and tripmeter. Cruise control adds to a relaxing, easy ride on the 4-wheel drive. Settle back into brightly-colored cloth seats and matching door panel inserts. Complete the aesthetics with full carpeting. Perfect.

Listen to the Xtraordinarily fine acoustics of the high-powered, 100-watt (25x4) Suzuki by Alpine stereo system, standard on the 4WD. It'll be music to your ears.

There's plenty of room for refreshments in the dual cup holders located in the center console.

A security alarm system on the 4-wheel drive helps to protect this treasure from harm, while power windows and door locks add to the fun and pizzazz on both X-90 models. It also has a rear window defogger to keep the scenery clear and crisp.

The X-90 is made for spending time in.

But don't stop there. Rest your refreshments in the dual cup holders on the center console. On the 4WD, a high-powered, 100-watt (25x4) Suzuki by Alpine stereo system is incredible. Look for a very happy face in the passenger-side vanity mirror. And, when it does need gas, which isn't often, there's a locking fuel filler door.

A sporty, ergonomically-designed dash brings a touch of class and more to the interior of the X-90.

The X-90 has it all. All the action, charm and Xtras for an active lifestyle and young-at-heart fun.

It's the ultimate vehicle. It's fun, it's versatile. It's Suzuki. The comfortable ride and great looking interior make the X-90 the right choice for an active, off-road weekend, out on the desert or up in the mountains. It's great for hauling your stuff. It's just right for commuting and buzzing around town as well as cruising out on the highway. It's the coming thing to bring a little fun and fanfare into an all-too-serious world. See it, hear it, drive it. The Suzuki X-90 is user-friendly in the friendliest sort of way. With a strut-your-stuff air about it. And a drive-me attitude. There is absolutely nothing like it.

Drive it and be transported.

The '90's - sure to be looked back upon as the decade when you only had to go outside because you really, really wanted to.

People are telecommuting to their job in ever increasing numbers.

Techno-geniuses have invented electro-stimulation machines that can give your body the sensation of a thousand situps while you watch cooking shows on TV.

At the gym, there are skiing machines, surfing machines, cycling machines and indoor rock-climbing walls.

Coming to your local mini-mall are cyber theme parks where virtual reality takes paying customers on thrill rides.

Tokyo residents can frolic and tan at indoor beaches complete with sun, sand and surfable waves.

Canadians are enjoying a full-size theme park, complete with a roller-coaster, totally underground.

Lest you fret that the whole world's going cyber, you can take heart that reading is back and book clubs are booming.

And a night of romance by the fire still ranks as America's favorite indoor sport.

SAFETY FEATURES

Along with fun and Xcitement, Suzuki has made a commitment to safety and security. The X-90 comes equipped with a full array of features to make driving pure entertainment and confidence a snap.

Xceptional fun with safety in mind. In the X-90, airbags supplement the 3-point seat belts and head restraints, so both driver and passenger are better protected from a moderate to severe frontal impact. Front and rear crumple zones have been designed to progressively absorb the energy of an impact. It has side impact protection. And, laminated windshield safety glass, tempered side and rear safety glass, as well as a breakaway inside rearview mirror, help reduce the likelihood of glass shattering and injuring occupants. An energy-absorbing steering column and instrument panel are in place to soften passenger impact. While daytime running lights increase visibility. **Xtremely well built for security.**

Anti-lock brakes on the X-90 reduce skidding and promote straight, smooth stops in bad weather.

The 4-wheel anti-lock brake system adds better control to your driving experience, while the ventilated front disc brakes reduce heat build-up and fade. In a crisis, the system automatically pumps the brakes to prevent their locking up. And the dual chamber master brake cylinders prevent the total loss of braking power if one cylinder should fail.

There's more. The X-90 has safety features that operate even while it's standing still. On manual transmission vehicles, the clutch interlock system assures that the starter does not engage until the clutch is fully depressed so the car cannot accidentally be started in gear. On automatic transmissions, the brake interlock system prevents shifting out of park without depressing the brake pedal. **Xamining the possibilities.**

So, take it out to the seashore and run it along the sand. Take it down that path less travelled and find out what it has to offer. Move it through city traffic. Take the dog to the beach. Make it a 4-wheel-drive sleigh in ski country. And know that Suzuki is always working hard to make yours a safer driving Xperience.

The X-90 comes with standard dual airbags, a safety feature that supplements the 3-point seatbelts. Remember to always wear your seatbelt. Do not install a rear-facing child restraint in the front passenger seat.

The people and the planet are safer and healthier for the new century.

Fat is out. Fiber is in. Men and women are exercising in much greater numbers, defying the effects of aging and choosing foods good for the heart.

U.S. smog has declined by a third since 1970, even though 85% more vehicles are now on the road.

In 1972, only a third of all U.S. bodies of water were safe for fishing and swimming. Today, almost two-thirds are safe.

Recycling has become big business. Nationwide, more than 22% of all municipal solid waste is recovered for recycling or composting.

Men and women are reducing stress in record numbers. Yoga, meditation and personal discovery are very much in vogue.

The new century is bringing the "global village" to reality and people are enjoying life and diversity on an ever-increasing international scale.

NOTE: This vehicle handles differently from ordinary passenger cars. Federal law cautions to avoid sharp turns and abrupt maneuvers. Always wear your seat belt. For specific details, please read your Owner's Manual for on- and off-road driving tips. Specifications and equipment based on information available at time of printing and subject to change without notification. Some vehicles shown with optional equipment. For more details on 1996 options, accessories and specifications, contact your local Suzuki dealer. *Tread Lightly!* On Public And Private Land. Along with concerned conservationists everywhere, Suzuki urges you to preserve your future off-road driving opportunities by showing respect for the environment, local laws and rights of others. **DRIVE RESPONSIBLY. BUCKLE UP FOR SAFETY. DON'T DRINK AND DRIVE.**

It's not just an Xceptional vehicle. It's a Suzuki.

With over 40 years of automotive engineering experience, it's no wonder we've perfected the fine art of having fun. Suzuki is consistently recognized as a global leader in innovative design and manufacturing. Our cars, sport/utility vehicles and motorcycles have conquered the harshest deserts, the deepest jungles, the toughest racetracks and the busiest city streets. Our outboard motors have even made fishing, water-skiing and recreational boating more fun. And we've got the loyal customers to prove it.

We operate production facilities in 25 countries and serve over 126 countries around the world. And our award-winning technology is also the driving force behind general purpose utility engines and other products.

This year, American Suzuki Motor Corporation celebrates the beginning of its second decade in America, with 330 automotive dealerships in 49 states. Our vehicles are - and always have been - about fun, reliability, fuel efficiency and good old-fashioned value. An ongoing commitment to the unique transportation needs of people just like you explains our success. That's why the Suzuki tradition of quality, fun and value goes into every vehicle we make.

WARRANTY We're behind you. When you purchase a new sport/utility vehicle, you're also buying the company that built it. And when you drive home in your new Suzuki, we go with you, via a warranty designed to protect and cover your new vehicle. Here's what our New Vehicle Limited Warranty covers: all components of the vehicle as supplied by Suzuki for 36 months or 36,000 miles, whichever comes first. The battery is covered for 24 months or 24,000 miles. You needn't worry about a deductible. There isn't one. Any repairs needed to correct defects in materials or workmanship will be made with no charge for parts or labor. Should original body sheet metal panels develop perforation due to corrosion, they're covered for 36 months, with no limit on mileage. The tires are covered by a separate warranty from the tire manufacturer. Our warranty covers so much because we're so confident in the vehicles we build. And because we think owning a Suzuki should be as comfortable and as enjoyable as driving one. For complete details of our warranty, please see your authorized Suzuki dealer.
