CTS

2004

CADILLAC

ELR

2004

FULLY GROUNDED YET SOMEHOW SET APART.

WITH INTELLIGENT DESIGN, EVEN THE WORLD FITS INTO PLACE.

THE WILL TO POWER FINDS INSTANT GRATIFICATION.

1 The 3.2L V6 DOHC is mated to a rod-actuated Getrag 5-speed manual transmission, a unit noted for its crisp, accurate feel and short-throw shifts.

2 The standard CTS engine is a 24-valve 3.2L V6 DOHC with 220 horsepower at 6000 rpm and 220 lb-ft of torque at 3400 rpm.

3 The new available 3.6L V6 VVT engine (right page) is mated to a performance-oriented 5-speed Hydra-Matic automatic transmission that provides much of the "feel" of a stick, including electronic engine braking in all gears.

For 2004, CTS offers the availability of an all-new 3.6L V6 VVT powerplant. It combines size and sophistication. And the bragging rights that go with 255 horsepower at 6500 rpm and 252 lb-ft of torque at 2800 rpm. Among its array of state-of-the-art features, most notable is the application of variable-valve timing (VVT) to both intake and exhaust valves. The system's continuously variable timing provides outstanding flexibility: 90 percent of peak torque is available across a remarkably broad operating range, from 1600 to 5800 rpm. In other words, from stoplights to freeway merges.

Also worthy of note, the 3.6L V6 VVT produces impressive fuel economy,* as well as smooth, polished performance. Features such as specially isolated cam covers and polymer-coated piston skirts were developed to reduce noise, vibration, and harshness. And the sound that does reach the vehicle occupants—through the dual outlet performance exhaust—has been carefully tuned to strike a rich and rewarding note.

The 3.6L V6 VVT's running mate is a Hydra-Matic 5-speed automatic transmission whose sport-shift algorithm optimizes shift points and torque application. With engine braking in all five gears, it provides performance and feel normally found only in a manual.

Smooth and powerful: The all-aluminum 3.6L V6 VVT features dual overhead camshafts (DOHC), four valves per cylinder, and a roller-finger follower valvetrain.

With variable-valve timing (VVT), phasers continuously adjust the timing of both intake and exhaust cams, allowing smoother idle, better low-end torque, and better top-end horsepower than would be possible without it.

Drive-by-wire electronic throttle control produces a smooth, gentle throttle response at low speeds such as in parking lot maneuvers; at highway speeds, it responds rapidly to pressure on the pedal.

*Estimated mpg 18 city/26 highway based on GM testing. Official EPA estimates not yet available.

smooth and powerful. The all-
 aluminum 3.6L V6 VVT engine
 features a DOHC (Dual Overhead
 Cam) design with 24 valves per
 cylinder, allowing for maximum
 torque and power. The engine
 is designed to provide a smooth
 and powerful performance, with
 a torque output of 252 lb-ft at
 2800 rpm and a horsepower
 output of 220 hp at 6000 rpm.
 The engine is also equipped with
 a variable valve timing (VVT) system,
 which allows the engine to adjust
 the timing of the valves to optimize
 performance for different driving
 conditions. This results in a more
 responsive and efficient engine,
 capable of providing a smooth
 and powerful performance in all
 driving conditions.

1 The 3.6L V6 DOHC is mated to a rod-actuated Getrag 5-speed manual transmission, a unit noted for its crisp, accurate feel and short-throw shifts.

2 The standard CTS engine is a 24-valve 3.2L V6 DOHC with 220 horsepower at 6000 rpm and 220 lb-ft of torque at 3400 rpm.

FULL-SPECTRUM PERFORMANCE.

1

2

3

1 CTS achieves an almost perfect 50/50 front-to-rear weight distribution. The resulting neutral handling attitude provides precise cornering and agility.

2 Large vented disc brakes with aluminum calipers, four-wheel ABS, and electronic rear brake proportioning produce smooth and even stopping.

3 The CTS four-channel StabiliTrak stability enhancement system helps you stay on your intended course. StabiliTrak senses the beginning of a skid or slide by comparing the car's response to steering input. Then it applies a quick and precise force to the appropriate brake. Available as part of the Sport Equipment Group, the system helps maximize the performance potential of the vehicle's rear-wheel-drive configuration. See a demonstration at cadillac.com.

This is a serious sport sedan that is exhilarating to pilot. Its rigid rear-wheel-drive chassis, advanced engineering, and premium components were developed, validated, and tested at the Nürburgring race circuit in Germany, the ultimate proving ground for vehicle dynamics. CTS transforms lessons learned there into precise handling, flat cornering, and right-now acceleration and braking.

CTS also conveys the benefit of supreme driving confidence, wherever the road may take you. In low-traction situations, for instance, the all-speed traction control system moderates engine output and engages the large vented disc brakes, seamlessly applying braking effort at one or both rear wheels to control wheel spin for improved traction on slippery surfaces.

For those who are most serious in their pursuit of driving pleasure, the available Sport Equipment Group includes the StabiliTrak stability enhancement system, sport-tuned suspension with automatic rear load leveling, speed-sensitive steering, and 17-inch cast aluminum wheels with W-rated tires.

A fully independent multilink suspension system reduces body roll—for flat, controlled cornering—without sacrificing ride quality.

• The long-arm/short-arm front suspension minimizes the effect of road disturbances.

The five-link rear suspension unit's long travel and precise geometry responsively translate engine power into dynamic handling.

1. The CTS achieves an almost perfect 50/50 front-to-rear weight distribution. The resulting neutral handling attitude provides precise cornering and agility.

2. Large vented disc brakes with aluminum calipers, four-wheel ABS, and electronic rear brake proportioning produce smooth and even stopping.

3. The CTS four-channel StabiliTrak stability enhancement system helps you stay on your intended course. StabiliTrak senses the beginning of a skid or slide by comparing the car's response to steering input. Then it applies a quick and precise force to the appropriate brake. Available as part of the Sport Equipment Group, the system helps maximize the performance potential of the vehicle's rear-wheel-drive configuration. See a demonstration at cadillac.com.

There is a serious sport sedan that is exhilarating to pilot. Its rigid rear-wheel-drive chassis, advanced engineering, and premium components were developed, tested, and validated at the Nürburgring race circuit in Germany, the ultimate proving ground for vehicle dynamics. CTS transforms lessons learned there into precise handling, confident cornering, and right-now acceleration and braking.

CTS also delivers the confidence of a smooth driving experience, wherever the road may take you. In the rain, for instance, the all-speed traction control system senses a loss of grip and engages the large vented disc brakes, sending a precise force to one or both rear wheels to control skidding on slippery surfaces.

In the pursuit of driving pleasure, the available Sport Equipment Group includes StabiliTrak stability enhancement system, sport-tuned suspension with automatic rear load leveling, speed-sensitive steering, and 17-inch cast aluminum wheels with W-rated tires.

A MARVEL OF EYE/HAND COORDINATION.

1 Two-way power adjustable lumbar support is included with the 10-way power seat option.

2 A unique "thumb wheel" mounted on the steering wheel provides intuitive audio source selection and volume control.

BOSE

Available entertainment possibilities include a premium Bose® digital sound system with RDS capability and XM Satellite Radio with 100 digital-quality channels of music, news, and entertainment programming. Activation and service fees are extra; not available in Alaska or Hawaii.*

For an in-depth understanding of CTS features and operations, a thorough review of the Owner's Manual is recommended. But for instant answers to the most commonly asked questions, touch the OnStar button on your visor. OnStar "Did You Know?" customer information service is available 24/7. For more information, see the Important Words page in the back of this catalog and visit www.onstar.com.

In keeping with CTS performance priorities, the interior is gracefully but purposefully driver-oriented. The center dashboard control stack is subtly canted toward the driver, and its integrated Driver Information Center (DIC) screen is mounted high to be within your line of sight. The DIC collects vehicle status and entertainment displays into one easily accessed reference point.

The front sport seats with articulating head restraints combine excellent support for cornering maneuvers with outstanding comfort for long-distance travel. And they are artfully designed to accommodate a wide variety of body types and sizes. The driver's seat includes eight-way power adjustment, and a center armrest adjusts to allow the driver to find the most comfortable position.

With OnStar Personal Calling you can obtain important information through OnStar's Virtual Advisor. Have e-mail read to you, or get stock performance reports, updates on local weather, traffic, news, sports, and more—all through voice commands that eliminate unnecessary fumbling for the cell phone, straining to see the numbers you dialed, or keeping only one hand on the wheel. (Prepaid calling charges apply. Available in most markets. OnStar voice recognition system may not work with all voices.) For further information about OnStar, see the Important Words page in the back of this catalog and visit www.onstar.com.

*Visit www.gm.xmradio.com for details.

CADILLAC LAUNCHES THE V-SERIES WITH A 400-HORSEPOWER CTS.

Coming early 2004, CTS-V is the first in a series of limited-production ultra-high-performance vehicles from Cadillac. Highlights include an aluminum 5.7L LS6 V8 engine producing 400 horsepower and 390 lb-ft of torque; a TREMEC T56 6-speed manual, a limited-slip rear axle, and a 3.73:1 final drive ratio to optimize acceleration—delivering a 4.6-second 0-60.* Large four-piston Brembo disc brakes with vented rotors produce impressive brake performance. High-performance suspension tuning makes for precise handling and responsive turn-in. The StabiliTrak stability enhancement system delivers impressive vehicle control. CTS-V also includes a special highly functional interior and distinctive exterior design cues such as a wire mesh grille, six-lug 18" wheels, and side rocker moldings. See cadillac.com for additional information.

*Based on preliminary testing.

1 In an emergency, press the OnStar® emergency button and a trained OnStar Advisor will contact local nearby emergency service providers; or if your air bags deploy, OnStar will attempt to contact you in your vehicle and can contact emergency help. See the Important Words page at the back of this catalog for additional OnStar information.

2 Key safety measures include front and rear crush zones and the extensive use of high-strength steel to surround occupants with a safety cage.

A NOTE ON CHILD SAFETY: Always use safety belts and proper child restraints, even in vehicles with air bags. Children are safer when properly secured in the rear seat. Never place a rear-facing infant restraint in the front seat of any vehicle equipped with an active air bag. See your vehicle Owner's Manual and child safety seat instructions for more information.

The first in a line of vehicles built on the Cadillac high-performance Sigma vehicle platform, CTS capabilities run well beyond providing world-class chassis dynamics. The vehicle was designed with front and rear crush zones to help absorb impact forces.

The CTS safety system also includes six air bags: driver and front passenger, dual-stage frontal air bags, side-impact air bags, and two head curtain side air bags mounted at the top of the roof rail to protect both front and rear passengers in the event of a side impact*.

Taking advantage of the CTS body-frame integral construction, engineers added noise-damping seals and lightweight foam virtually all around the cabin, resulting in acoustics that shut out the world. This sealed environment sets the stage for an electronic climate control system that manages ventilation and temperature as well as CTS handles the corners.

* Head curtain air bags are designed to help reduce the risk of head and neck injuries to front and out-board rear-seat occupants during certain side-impact collisions. Always use safety belts and proper child restraints, even with air bags. Children are safer when properly secured in a rear seat. See the Owner's Manual for more safety information.

Air bag inflation can cause severe injury or death to anyone too close to the bag when it deploys. Be sure every occupant is properly restrained.

CTS FEATURES AND OPTIONS

	CTS	LUXURY PACKAGE	SPORT PACKAGE
POWERTRAIN			
ENGINE AND DRIVETRAIN			
3.2L V6 DOHC with 220 hp at 6000 rpm and 220 lb-ft of torque at 3400 rpm	■	■	—
3.6L V6 VVT with 255 hp at 6500 rpm and 260 lb-ft of torque at 2800 rpm	□	■	◆
Rear-wheel drive	■	■	■
Getrag manual 5-speed transmission with mechanical shift linkage (not available with 3.6L V6 VVT engine)	■	—	—
Hydra-Matic 5-speed automatic transmission with overdrive 5th gear and electronically controlled shifts, includes winter and sport modes (requires 3.6L V6 VVT engine)	□	■	◆
Engine block heater	—	□	□
CHASSIS & SUSPENSION			
STABILITRAK			
Computer-controlled, 4-channel stability enhancement system	□*	□*	◆
All-speed traction control with brake and engine intervention	■	■	■
4-wheel disc brakes with anti-lock system	■	■	■
SUSPENSION			
Front: Independent short/long arm, coil-over-monotube dampers with anti-sway bar	■	■	■
Rear: Independent, modified multilink with coil-over-monotube dampers and anti-sway bar	■	■	■
STEERING			
Speed-sensitive, variable-assist power rack-and-pinion	■	■	■
SPORT EQUIPMENT GROUP			
High-performance FE-3 suspension, StabiliTrak stability enhancement system, speed-sensitive steering, automatic electronic rear level control, P225/50R17 W-rated tires, and 17" cast aluminum wheels (see wheels on adjoining page for details)	□	□	◆

IMPORTANT WORDS ABOUT THE CATALOG

We have tried to make this catalog comprehensive and factual. We reserve the right, however, to make changes at any time, without notice, in prices, colors, materials, equipment, specifications, models, and availability. Since some information may have been updated since the time of printing (8/03), please check with your Cadillac dealer for complete details.

Cadillac reserves the right to lengthen or shorten the model year for any product for any reason, or start and end model years at different times.

Note: Some photographs in this catalog show vehicles with optional equipment.

ONSTAR OnStar services require vehicle electrical system and analog wireless service to be available and operating for features to function properly. OnStar uses existing emergency service providers as well as analog wireless and satellite technologies and is subject to their limitations. The U.S. Federal Communications Commission (FCC) ruled that wireless carriers will no longer be required to support the analog wireless network after February 16, 2008. After that time, if the carriers for OnStar elect to provide only digital service, OnStar service will be available only through dual-mode hardware, which may require the purchase of a system upgrade. Call 1-888-4ONSTAR (1-888-466-7827), see your OnStar Owner's Guide, or visit www.onstar.com for system information and details.

GM ACCESSORIES Visit gmaccessorieszone.com for information on genuine GM Accessories for the CTS.

ENGINES Cadillac products are equipped with engines produced by GM Powertrain or other suppliers to GM worldwide. The engines in Cadillac products may also be used in other GM makes and models.

ASSEMBLY Cadillac vehicles and their components are assembled and produced by different operating units of General Motors, its subsidiaries, or suppliers to GM worldwide. We sometimes find it necessary to produce Cadillac vehicles with different or differently sourced components than originally scheduled. Since some options may be unavailable when your vehicle is assembled, we suggest that you verify your vehicle includes the equipment you ordered or, if there are changes, that they are acceptable to you.

UPDATED SERVICE INFORMATION Cadillac dealers receive useful service bulletins about Cadillac products. You may purchase them from Helm Incorporated by calling 1-800-551-4123 or by visiting www.helminc.com.

NEW-VEHICLE LIMITED WARRANTY This warranty is for GM vehicles registered in the USA. See your Cadillac dealer for terms and conditions.

Covered for 4 years/50,000 miles (whichever comes first):

- The complete vehicle
- Tires
- Towing to your nearest Cadillac dealership
- Cosmetic corrosion resulting from defects

- Repairs made to correct any vehicle defect
- No charge for most warranty repairs

Covered for 6 years/100,000 miles (whichever comes first):

- Rust-through corrosion

CORROSION PROTECTION Cadillac vehicles are designed and built to resist corrosion. All body and sheet metal components are warranted against rust-through corrosion for six years or 100,000 miles, whichever comes first. Application of additional rust-inhibiting materials is not required under the corrosion coverage and none is recommended. See your Cadillac dealer for terms of this limited warranty.

SAFETY AND SECURITY The following are just some of the features standard on the 2004 CTS, unless otherwise noted:

OCCUPANT PROTECTION

- Automatic door locks
- Brake/transmission shift interlock
- Child security door locks and door retention components
- Manual lap/shoulder belts and air bags, driver/front passenger—front and side
- Front-to-rear head curtain air bags
- Pretensioners and energy management system
- Passenger-guard inside door lock handles
- Power window lockout
- Safety belt cinch capability for child seats
- Steel safety cage

SECURITY

- Anti-lockout feature
- Audible theft-deterrent system (on vehicles equipped with Luxury or Luxury Performance Packages)
- Battery rundown protection
- Laser-etched VIN plate
- PASS-Key III theft-deterrent system
- Remote keyless entry
- Stolen vehicle tracking/emergency communications

CRASH AVOIDANCE

- Anti-lock brakes, front and rear
- Automatic daytime running lamps
- Disc brakes, front and rear, audible wear indicator
- Door warning lamps or reflectors
- Fog lamps
- Front, side, rear window defoggers
- Halogen headlamps
- Inside electrochromic rearview mirror
- Outside power rearview mirrors, heated
- Stability enhancement (on vehicles equipped with Sport Equipment Group)
- Steering wheel-mounted controls
- Tinted glass windshield
- Tires with built-in tread wear indicators
- Traction control

CADILLAC OWNER PRIVILEGES

By driving a CTS, you're part of a select group that deserves special privileges. These include 24-hour roadside service (1-800-882-1112) and trip interruption protection. Free roadside services include: jump-starts, towing, lockouts, fuel delivery (fuel charges extra), and flat tire changes. Trip interruption protection can reimburse you for expenses incurred as a result of a warranted repair that interrupts your travel. Alternate transportation is also available whenever your vehicle is in for warranted repairs. You can also rely on the GM bumper-to-bumper limited warranty. All this coverage is in effect for the first 48 months or 50,000 miles of ownership, whichever comes first. See your dealer for complete details, terms, and conditions of these programs and the GM limited warranty. Another complimentary service for Cadillac owners is the Cadillac Center at My GMLink, a one-stop resource to enhance your Cadillac ownership experience. Exclusive member benefits include online service reminders, vehicle maintenance tips, online Owner's Manual, special privileges, and more. Sign up today at www.mylgmlink.com.
